# MAYOR'S ANNUAL SUGGESTIONS

Concluded from First Page.

ing pushed forward as rapidly as is deemed consistent with careful work and thoroughness. Two very important decisions have been secured from the supreme court upon cases taken up from this city by our city solicitor. The first in the matter of the ansexation of a part of Lackawanna township in which the constitutionality of the municipal act of 1889, under which the city has been operating for five years, was vigorously attacked. The success of the vigorously attacked. The success of the attack would have thrown the city gov-ernment into the utmost confusion, ren-dering uncertain the tenure of office of its officers, and dubious very many of its ordinances. The supreme court, how-ever, has saved and sustained the act, and has placed municipal charters of cities of the third class upon an unassallable basis.

The other case was relative to the pow-er of the city to grade and assess the cost er of the city to grade and assess the cost by the foot front rule, which power was denied and was held doubtful by our court. The supreme court, however, has now fully sustained the power which not only saves assessments already made under ordinances heretofore passed, but assures the city of its powers to make improve-ments in this manner hereafter. It is a great advantage that it can do so, as the expense of viewers under the benefit of the system is so

great as to represent a considerwhereas, improvements made by the foot front rule all such expenses are avoided and much time and trouble is saved. In addition to these cases there has been a large amount of important business trans-acted during the past year other than the rdinary business of the law department. There have been thirteen sets of viewers appointed to assess alleged damages re-mitting from street improvements, each of which have required constant attention which have required constant attention before viewers and in the court. The damages awarded by the viewers will amount in the aggregate to \$30,000. Under direction of councils appeals have been

A complete docket has been made of all cases open and pending in which the city is a party; and nearly 1,000 liens which have either been collected during the year or have been previously paid and not satisfied, have been satisfied and the record so far cleared of the mass of open and unatisfied liens.

A complete and efficient system for the objection of liens has been introduced, so collection of hens has been introduced, so that the clashing and confusion between the law and the treasury departments which gave frequent sunoyance to the of ficials and to the taxpayers may be obviated.

The collections of the department during the eleven months since May I have amounted to more than \$26,000.

FINANCES

The condition of the finances of our city at the present time is a source of gratification. Our total bonded indebtedness is about \$528,500. The bonds and cash in our sinking fund amount to \$124,400, leaving a net indebtedness of \$385,100 upon an assessed valuation of about \$19,000,000, the annual receipts from taxation being sufficient to pay the running expenses of city government, the interest on the bonded debt and to meet the legal requirements of the singing fund without making the burden of taxation onerous to the tax

him to give his entire services to the city, has already been made manifest in the improved efficiency of the department. I would earnestly recommend that permanent men be added to the lists of the vari ous companies from time to time with the ous companies from time to time with the end in view that our fire system shall eventually emerge into a paid department, a condition which will soon be made im-perative by the rapidly increasing popula-tion and area of the city. I am much gratified to observe that your honorable bodies have provided in your last appro-priation ordinance for the purchase of a chemical angine for the use of the depart-neut. The use of this machine will un-

ment. The use of this machine will un-doubtedly save much valuable property which has oftentimes heretofore been destroyed by water.

The honorable councils provided last The honorable councils provided last year for the purchase of two sites for the fire department, one for the Nay Aug Hose company on Linden street, and one for the Cystal Hose company on Mulberry street, directly in the rear of the city building. There is, I believe, sufficient lunds left from the appropriation for the erection of one of these buildings. I would be that the the one in the rear of the suggest that it be the one in the rear of the city building for the reason that the lease

of the building now occupied by the Crystal Hose company expires within the next year and siso that the police department may be provided with a patrol station, which is much needed at the present time. would, therefore, earnestly urge upor your honorable bodies that the building communities of the new councils be instructed to take this matter up at once and give it their most careful attention.

STREET DEPARTMENT. We are pleased to note the increased number of our paved streets and the work that is being done in grading and otherwise improving those already paved: \$23,-788.75 was spend during the past year for pavements, and \$9,287.00 for grading, but the general condition of our unpaved streets is a disgrace to the fair name of our cuty. This is caused first from the fact. city. This is caused, first from the fact that during the past year the ward approprintions were not under the control of the street department, and second, to the inadequacy of the amount appropriated for street purposes. When we consider that the number of miles of streets, avenues, courts and places in this city exceeds 140, we must admit that an appropriation of \$14,000 is not sufficient to keep those streets in proper repair, and that it is impossible for the street commissioner note the washouts and other imperfections upon our highways, and to be able to repair the same before any damage might occur with the present arrangement of the street de-partment. I suggested to the honorable councils last year of the necessity of creat-ing two assistants for this department. I held then, and I still hold, that the creat-

ing of those offices would not of necessity increase the cost of maintaining the de-partment. We could, under this arrangepartment. ment, hold them responsible for the condi-tion of the streets within their districts, and also eliminate from our pay rolls the expense of foremanship in each and every

ward in the city. I believe that this department of the city government is one of the most important, and when we take into consideration that

ENGINEER'S DEPARTMENT.

From the tabulated statement made by the city engineer for his report to your honorable bodies we find that the total ileage of sewer laid in the city is thirty-ve. The total cost of sewers constructed during the year is \$64,600, and the total cost of sewers inidup to the present time is \$427,000. The greater portion of our sewer system is in the central wards of the city, with the remainder in the North End and West Side. The southern end of the city has thus far been without this most acces-sary adjunct of every well regulated center of population, but we are glad to note that attention has lately been given to this matter in that portion of the city, and a project is now on foot to establish another sewer district in that locality and thus take the first step toward giving that por-tion of the city's population equal sanitary conveniences with the remainder.

which have been prosecuted under its su-pervision, and also the complete set of maps and drawings which have been made of the city showing its entire system of sewers and the paved streets, showing the material of which they are constructed and the cost of the same, as has also been

appended to the sewer maps.

The completion of those drawings now renders it possible for every citizen desirrenders it possible for every citizen desiramount allowed, nor should we ever consome any time in the contemplation of
plans which would plainly necessitate a
greater outlay than we are authorized to placed in concise and satisfactory form at the disposal of every citizen.

POLICE DEPARTMENT. The final adoption by the honorable councils of last year of the ordinance providing the rules and regulations for the administration of the police department in conformity with our present charter and providing for the addition of ten more en to the working force is most gratify ing. While the number of policemen is still insufficient to give the city proper patrol service, which its population and area might reasonably demand, the williugness of the councils to provide, from time to time, additional men is evidence that they are awake to the importance of maintaining the efficiency of this depart

ment.
The duties of an officer are not at all times of the most pleasant character, and while it may appear that he is too exact-ing in the performance of that duty, we must remember that implicit obedience to the law among some classes is entirely dependant upon the activity and prompt ness in the enforcement of those laws by the officers of this department, and must of necessity be upheld by the authorities, The efficiency attained by this depart-ment is largely due to the untiring efforts of the chief of police, who has devoted his time and energy with one object in view,

which has been to give the public the best possible police service, with the limited force at his command. During the early part of last year the police quarters in the city building having Deen completed we removed the First pre-cinct from its old quarters in the Center street station into the new apartments.

The condition of their new quarters is ex-cellent, as is also that of the Second and Fourth Precinct station houses, but the Fourth Precinct station houses, but the condition of the Third Precinct or North End station house, which is located in the basement of the building occupied by the Liberty Hose company, is universible and unhealthy. The sanitary arrangements of the house being poor, after every rainstorm the floor is flooded with water. The Center Street station house having host its ter Street station house, having lost its days of usefulness as a police station, and being located in that portion of the city which makes the lot desirable for the loca-tion of a business block, I would advise your honorable bodies to direct the proper your nonorable bodies to direct the proper authorities to dispose of said property and devote the proceeds to the repairing of the Third Precinct station house and the bal-ance to be used for the police department.

The total arrests during the past year, as is shown by the monthly reports submit-ted by the police department to your houorable councils, was 1,921. The total fines collected through this department from various sources was 84,588.63, which has been paid over to the treasury, as required by law. This amount shows an increase of \$2,213.98 cents over the preceding year.

NEW LEGISLATION. During the past year, in attempting to nforce the ordinances which provide for the cleaning of our sidewalks, the abating of nuisances, the removal of obstructions from the public highways, the digging up of our streets without a permit, and the enforcement of the ordinance regulating the erection of buildings within the fire limits, it has been found in many cases that these ordinances either have no penalty attached or were so losely drawn that

they could not be enforced.

There is no question of the statutory power of the councils to pass ordinances. which will effectually regulate all these matters. But as soon as an effort is made The suggestion which I made to your bonorable bodies in my last annual communication and which has been adopted, namely, to increase the salary of the chief of the fire department, and which directs him to give his entire services to the alexamination. I would therefore the greatest care and the highest professional akill is necessary in their preparation. I would therefore bodies of Mrs. James Nealis, who lives him to give his entire services to the alexamination of experienced law-ment and sustained a sprained wrist.

The injured ladies were taken to the house of Mrs. James Nealis, who lives near by and Dec. ordinances referred to the judiciary com-mittee in conjunction with the city solicitor to prepare the necessary ordinances to cover these irregularities. It is highly important that this matter should be atcended to at once and that not only in the present case, but that in all future legislaion ordinance having penalties attached and ordinances providing for the grading f streets and the construction of t be necessary for them to receive the ap-roval of the city solicitor before their mal passage through the councils.

There has been considerable interest manifested on the part of our citizens as

to the advisability of taxing the poles of the various electrical companies which

re doing business in the city.

In the consideration of this subject we nust not be unmindful of the fact, first, that it was in the promoting of some of these business enterprises that we were alied so materially in the rapid and per-manent growth of our city, and second, that while many of these companies are enjoying free from all taxation the valuable franchises granted them by the city, there is one company which is paying a fair price for the privileges granted it by the municipal authorities. I refer to the Scranton lineminating, Heat and Power company, which is furnishing the city building and engine houses their light at a cost, I am informed, of about \$2,000 per ennum in consideration of the franchises

I would suggest that a committee be appointed to wait upon the management of these various companies to determine the actual number of poles necessary (I mean by this, a case where a single pole could be used in common by two or more companies) and report their findings to your honorable bodies, and upon that basis pass an ordinance providing for a tax upon the excess. By this method we would re-move many of those poles which are unquestionably a mar to the otherwise at-tractive appearance of many of our most prominent thoroughtares.

I also desire to urge upon your honor-able bodies the passage of an ordinance compelling the Scranton Traction company to use fenders upon its cars for the better protection of the lives of our citizens; also to regulate the speed at which it shall run its cars through the streets of the city, and to prohibit the charging of double fares within the city limits.

Our city ordinances are entirely lacking in the regulations and restrictions which it is customary with other cities to place upon the public cab service for the protec-tion of the public in general and especially for the benefit of strangers whom business or pleasure brings into our mid-t. Rumors have recently come to me that it is a common practice with some of our local cab-men to charge strangers exorbitant rates, which is not only an injustice to the tray eler, but also to us rs a city, and if allowed to continue will eventually attach a reputation to the city which is undesirable and unnecessary. I therefore suggest that the nonecessary. I there is a management points throughout the city rate for cabs and also establish cab stands rate for cabs and cabs rate for cabs

its provisions.

As the city of late has been either ac As the city of late has been either ac quiring or negotiating for the possession of lands for public parks. I would recommend that an ordinance be passed relative to the police regulations for the protection of public property in these places.

As there is a conflict to some extent in certain provisions as embodied in the building and fire limit ordinances, and as the expansion of the business portion of

the expansion of the business portion of the city would seem to necessitate the in-crease of the fire limit for the better pro-tection of the business blocks in that sec-tion, I would suggest that the matter be referred to the proper committee, with in-structions to report an ordinance for the purpose of enlarging the fire limits of the

City.

I submitted a proposition from the Scrantou Electric Light and Heat company, by its president, Mr. W. W. Scranton, to the honorable councils of last year, to sell to the City of wherein he offers to sell to the City of Scranton the electric light plant of his company, which is now turnishing the city its light, for two hundred and fifty thous-and dollars. This proposition is well wor-Conveniences with the remainder.

I also take pleasure in cailing attention at this time to the excellent magner in which the engineer's department has looked after the various works of the city

thy of your most careful consideration, and I would suggest that your honorable bodies appoint a committee to inquire into the condition of the plant, the cost of maintaining it, and report their findings

to your honorable bodies, so we might be able to decide as to the advisability of making the purchase,
The citizens have seen fit to authorize

The citizens have seen fit to authorize you to issue \$250,000 worth of bonds to be used in the purchese of approaches and the erection of tridges over the Luckswanza river and the Roaring brook. It is very important that in the erection of these bridges we shall not exceed the amount allowed, nor should we ever consume any time in the contemplation of plans with world plainly necessitate a

With the knowledge we possess of the cost of the approaches, we can easily de-termine the amount that will remain for the building of the bridges proper, an cause the plans and specifications of the said bridges to be drawn up accordingly. Under any circumstances, however, we would not be warranted in a matter of such grave importance to proceed wit any undue hasts. The most careful at tention should be given to every detail of the work and the cost fully determined, before the city shall enter into any contract making it liable for any amount in excess of the sum appropriated; for it is by this method alone that the undertak-

ing can be carried through to completion to the satisfaction of yourselves and of the public whom they are intended to serve. In conclusion, I desire to thank the hon-orable councis of the past year for the courtesy which has been so uniformly ac-corded me; and also to thank the heads of the various departments for the support and the cheerful co-operation they have at all times given me in the discharge of the duties of my office. I hope that the cor-dial relations which have existed during the year just closed between the chief executive and the honorable councils will be continued during the ensuing year, will the thought ever foremost in our mindthat the business which we are here to transact for the public is an obligation confided to us by our fellow-citizens, and a responsibility which it is our duty to per-

I am very truly your obedient servant. W. L. CONNELL, Mayor. It was directed that the message be received and filed and the subject mat ter referred to the respective committees, the city clark being directed to make notes of the suggestions made and place them in the proper commit tee boxes for consideration and action.

OVER A 12-FOOT EMBANKMENT.

Street Car Leaves the Track and Several Fersons Ars Hurt.

As Eynon and Taylor street car No. 202 was passing along Robinson screet, at the junction of Ninth, at about 1 50 yesterday afternoon, it suddenly left the track and plunged down a 12-foot embankment, painfully injuring nev eral persons.

The par was in charge of Conductor Arthur DeGraw and Motorman Joseph De Nike, and was not going at a rap d rate of speed at the time of the accident. There is a curve in the road where the car left the track, and care is generally exercised at this point. The only warn ing given was a sudden lurch of the car a moment before it toppled over the bank

At least ten persons were in the car at the time and scores gathered within a few minutes after the disaster. Those hurt were Mrs. W. Latimer, of Gouldsbore, whose head came in contact with one of the windows and sustained a gash about four inches in length. Others who suffered from injury and shock were Mrs. John Gilli gan, of Priceburg ; Mrs. James McClaren of 436 Franklin avenue: Mrs. W. H Cutter, 113 Hyde Park avenue, and lady whose name could not be learned.

and Moylan summoned, Afterward Mrs Latimer, who was the most sethe residence of her son, John D Latimer, of Oswell's court, and the others were taken to their respective homes. The car turned nearly over in its

plungs and was badly shattered. RECORD IS SMASHED AGAIN.

Great Output of the South Works for the

Month of March The South Works of the Lackawanna Iron and Steel company made during the month of March 23 317 tons of ingots in the Bessemer department. This beats all former records. The previous highest record was made by Scranton Steel company during the month of March, 1890, making 22,042 ons in fifty-five turns. The product of 23,317 tons was made by the Luckuwanna Iron and Steel company running only fifty turns.

While it is claimed that the capacity of the plant is much greater, the product of last month is an evidence of crawling up from time to time until the limit is reached. We understand it is not so much a question of high product, as more attention is given towards working economically. The price of rails being so low, it requires careful management to meet the mar-

Splendid Concert Tuesday Evening. Victor Herbert, the renowned violincello player, formerly with Theodore Thomas but more recently leader of Gilmore's band, will give a concert at Young Men's Car.st-ian Association hall Tuesday evening un-der the auspices of the Ladies' Aid society of the Asbury Methodist Episcopal church. He will be assisted by Miss Jean Siee, a ne will be assisted by all seem care, a contraite singer who possesses a voice of rare power and sweetness. The concert will be one of the most enjoyable that Scrantonians have had an opportunity of attending this season. attending this season.
